29 June 1961

MEMORANDUM FOR: Chief, Material Staff, IPD-DD/P

SUBJECT : System IV Test Set, MP-12415

25X1A

1. It is requested that the various components for the System IV Test Set, in accordance with the attached equipment list #44, dated 12 June 1960, be collected and retained at ██████████ with the other System IV components in storage at the depot.

2. The background for the above request is as follows:

A. When the decision was made to operationally deactivate System IV, it was agreed that the entire system would be stored together so that it could be re-activated on short notice.

B. ██████████ was instructed to accomplish the above by ██████████ 0001 (OUT 67370), dated 25 May 1960. ██████████ 2422 (OUT 70185), dated 0001 2 August 1960 requested shipment via C-124 MATS-AMM-44. ██████████ 6066 2 August 1960 reported 58 boxes of System IV (IF 30513), dated 10 August 1960 reported 58 boxes of System IV shipped to ██████████

C. Most of the items comprising the test set are in general stock at ██████████. They have lost their identity as a part of the System IV, thus obviating any possibility of rapidly assembling the system which was a major premise in the deactivation of the system.

D. Please advise the Communications Staff when all components of the test set have been assembled.
